**SPEAKER BIOGRAPHIES:**

**Skip Goodrich, owner, CEO, Underground Supply Company, Haydenville, MA**

Skip has been in the concrete industry for over 20 years and currently serves on the Board of Directors of the Northeast Precast Concrete Association—a professional trade organization of producers of precast concrete products—which works to improve and maintain quality production within the industry. He is the owner/CEO of Underground Supply Company, located in Haydenville MA, where he manufactures and sells concrete septic tanks, tight tanks, distribution tanks, and other concrete products for residential use. Underground Supply will soon expand to a new, 7,200 sf production building in Whately, MA .

**SPEAKER BIOGRAPHIES:**

**Kim Nace – Executive Director**

Kim Nace holds an M.A. in International Administration from (SIT?) World Learning and an M.A. in Educational Leadership from Keene State College. She was a Peace Corps volunteer in Botswana and has taught children of all ages. She coordinated research funded by the MacArthur Foundation and later served as an Elementary School Principal—in rural Vermont and in Chennai, India. She created an educational video about composting toilets for her 1989 master’s thesis project and is pleased to again be engaging others in the possibilities and practicalities of recycling human waste at the Rich Earth Institute.

**SPEAKER BIOGRAPHIES:**

**Composting Toilets Presenter Conor Lally** is an ecological sanitation planner and composter with a background in watershed science and ecological design. He graduated from Boston University with a Master’s in Energy and Environmental Analysis, where his studies focused on the technical and social feasibility of composting toilets and urine diversion systems. He earned a B.S. in Watershed Science from SUNY College of Environmental Science and Forestry in Syracuse, NY where he studied watershed science, ecological engineering, and emerging green building programs. He has previously served as Project Manager for John Todd Ecological Design, and is a co-founder of Nutrient Networks, Inc.

**SPEAKER BIOGRAPHIES:**

**Abraham Noe-Hays – Research Director**

Abraham Noe-Hays has been working with dry sanitation systems since 1990. He holds a B.A. in Human Ecology with concentrations in agroecology and compost science from the College of the Atlantic, where his interest in recycling human manure led to an internship at Woods End Research Laboratory and his thesis project, “An Experiment in Thermophilic Composting.” He has operated Full Circle Compost Consulting since 2001, providing complete design, manufacture, and maintenance services to individuals and institutions with dry toilet systems. Since 2012, As Co-Founder and Research Director of the Rich Earth Institute, Abe designs and tests new technologies for urine collection and treatment and conducts agronomic field studies testing urine derived fertilizer products.

**SPEAKER BIOGRAPHIES:**

**Glen Ayers has been the Regional Health Agent** for the Cooperative Public Health Service in Franklin County since 2007 and has worked with 15 towns over the past 20 years. He began his professional career in 1980 as a Soil Scientist for the PA DEP and has been interpreting complex regulations since then. He has a BS and MS in Soil Science, is a Registered Sanitarian, and maintains several other public health certifications.

Paul Nietupski Department of Environmental Protection (DEP) Engineer V Section Chief of the Waste water Program. Title V contact for local health
