Planning Board

Franklin Regional Council of Governments

“We, the people of Franklin County, in order to serve the interests of the citizens of our region, do hereby affirm that the 26 towns in Franklin County have vital common concerns that transcend our individual borders and that the ability of our towns to address important public issues often depends on our local governments acting together. We therefore establish for ourselves and for our communities the means to effectively serve our towns and to deal with issues which transcend the existing boundaries of our town governments, and do hereby adopt this home rule Charter for the Franklin Regional Council of Governments...”

— Preamble of the Franklin Regional Council of Governments Charter, adopted July 1, 1997.

Service

The FRCOG serves the communities of Franklin County individually and collectively. We are committed to serving town governments, municipal boards and committees, businesses, and our citizens. We work collaboratively with other regions and other organizations. Our goal is to improve the efficiency and cost effectiveness of municipal governmental functions and improve quality of life in our region.

Community

We believe leadership in education, collaboration and capacity building to be important parts of strengthening the individual, the community, and the region and take care to inspire community involvement and democracy. We recognize that a healthy community requires balancing diverse needs such as those of economic development and natural resources protection, or the needs of one community with the needs of the region.

Advocacy

We advocate on behalf of our communities and the county at the federal, state and regional levels. We work together to advocate for legislative action, social policy, and governmental programming that recognizes the unique character and conditions of our rural area.

Quality and Professionalism

We provide high quality services through well-trained, technically proficient staff; to offer informed and professional technical assistance; and to be accountable to towns, the public, and granting authorities.
