

Assessment Overview

Why is it being done?

- The Blueprint, SAPHE act, AND ARPA funding, has provided us with an unprecedented opportunity to support Local Regional Public Health.
- To provide insight into current capacity to meet regulatory and statutory obligations
- To understand and address needs / gaps in resources and capacity

With the information collected, DPH can:

- Align training resources with regional needs
- Expand workforce development efforts
- Improve access to public health services across the Commonwealth

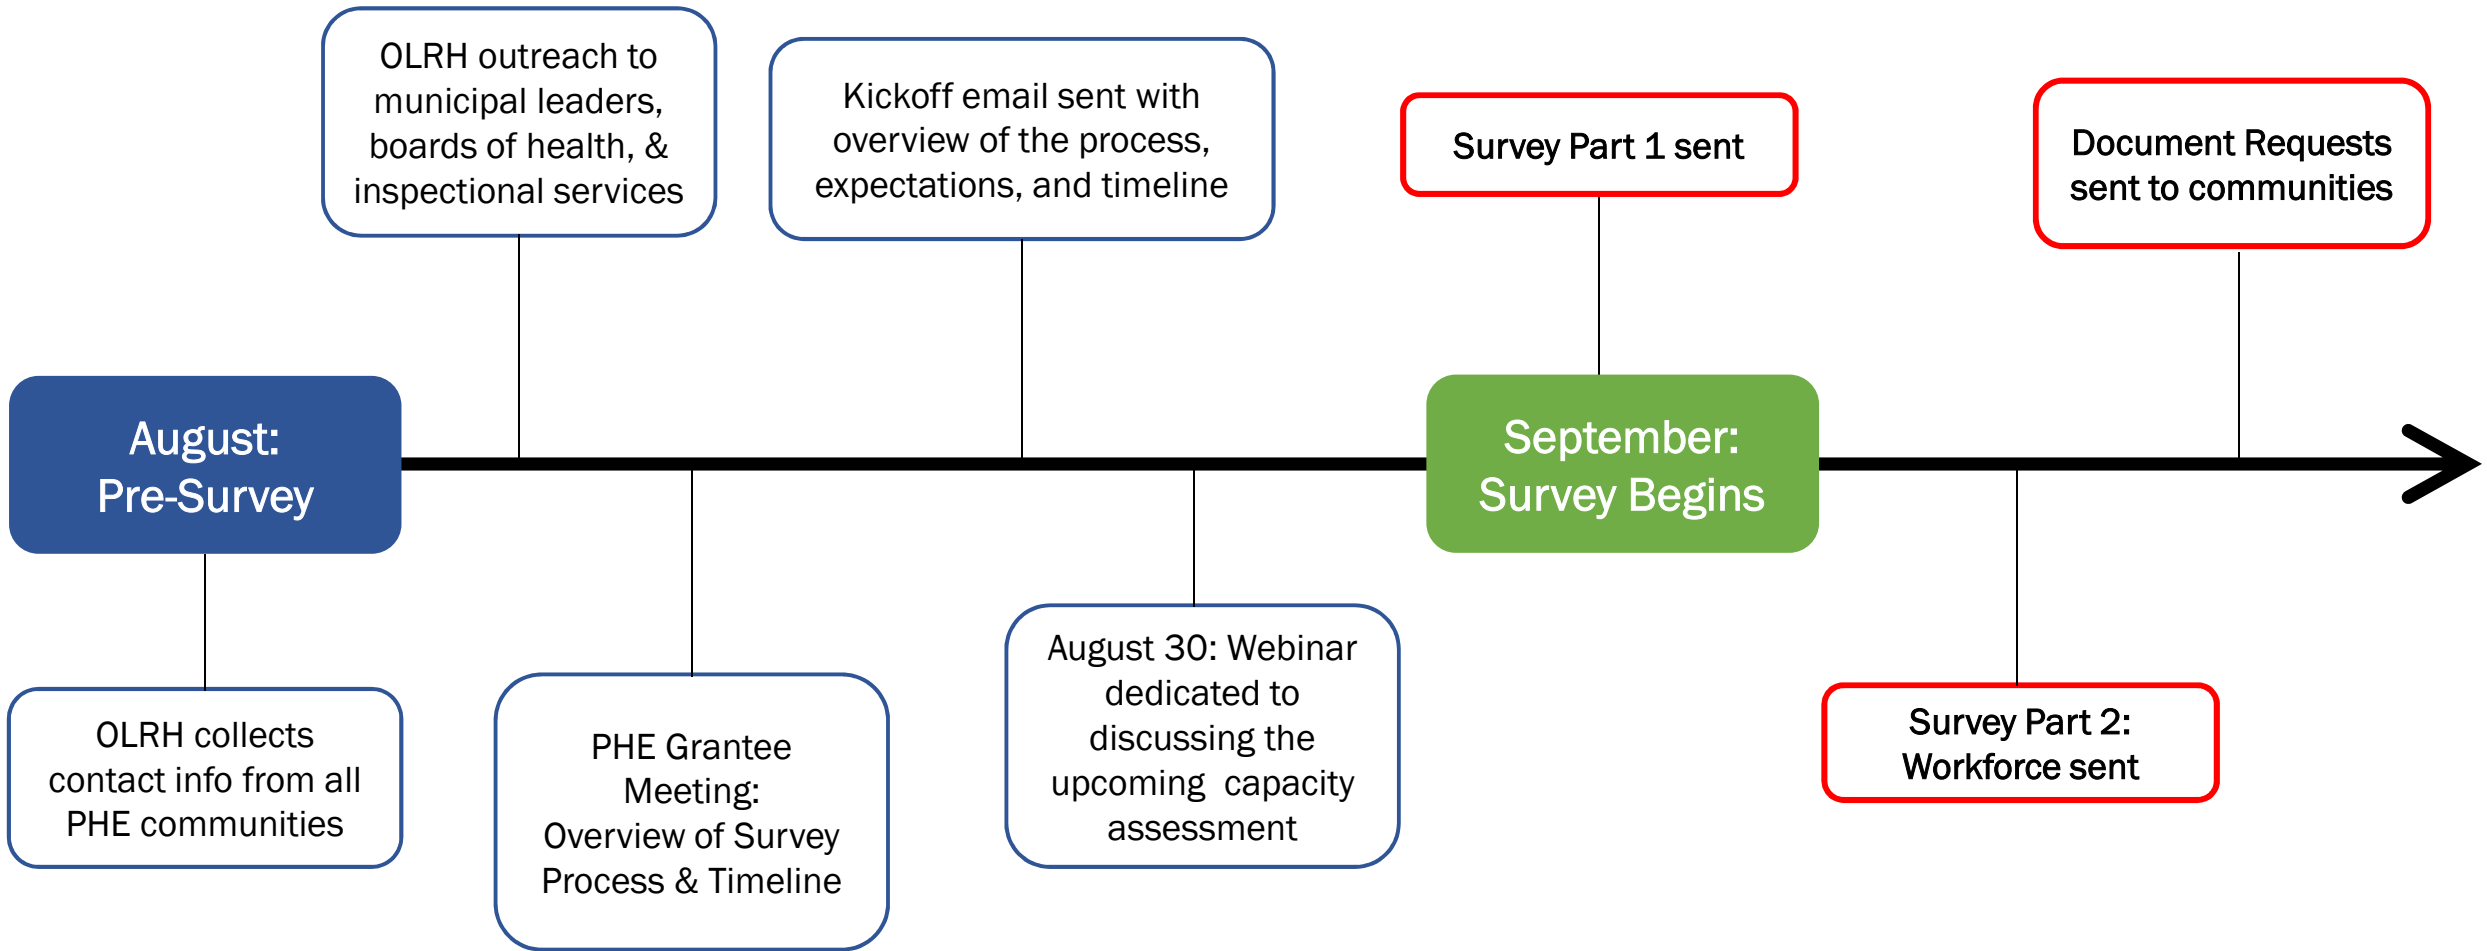

This is a **resource assessment** – DPH needs to know where resources are needed in terms of staffing, training, and funding in communities across the Commonwealth.

PHE Grantee Involvement

Steps PHE Grantees Can Take to Make the Assessment Successful

- Enlist support of your grant coordinators in compiling and delivering this information
- Provide the most accurate information possible, even if that identifies a gap in services
- Explain this effort to department staff to ensure collaboration and allay concerns
- Be as timely as possible with submission of requested information

Timeline: Overview

NOTE: All communications will come from OLRH
